SUMMARY

Results-driven **Fullstack Developer** and **AI Specialist** with a strong background in enterprise-level software development at **Accenture**, specializing in the **Next.js, React, and Vercel** ecosystem. Expert in integrating **Generative AI** and **Agentic AI** workflows to build scalable EdTech and business solutions, such as **Malejo Math**. Unique professional profile combining advanced analytical skills as a **Mathematics Professor** with a proven track record of leading digital transformation for over 120 educators. Committed to delivering high-performance, clean-code applications that bridge the gap between complex business logic and exceptional user experience.

EXPERIENCE

Packaged App Development Analyst

Accenture **Apr 2025 - Feb 2026, Salta, Argentina**

- Engineered and maintained enterprise-level web applications for international clients using **Angular**, **React**, and **Vue.js**.
- Integrated frontend applications with **.NET** backend services and REST APIs, optimizing data flow and system performance.
- Collaborated in **Agile/Scrum** environments, working closely with Product Owners and Tech Leads to deliver business-oriented solutions.
- Managed end-to-end development lifecycles, including task tracking and sprint progress, using **Azure DevOps**.
- Participated in the analysis of deployments and collaborated with QA teams to ensure all fixes met high stability and quality standards.
- Implemented reusable Angular form components with layered validation and filtering logic, reducing duplicated UI code and improving consistency across enterprise client workflows.

PROJECT

Malejo Math – AI-Powered EdTech Platform

Personal Project / Independent Development • v0-malejo-math-app.vercel.app • April 2026 - May 2026

- Designed and developed a Fullstack EdTech solution using **Next.js**, **Prisma ORM**, and **Tailwind CSS** to automate math evaluations.
- Integrated **Generative AI** to provide students with step-by-step logical explanations and immediate feedback on errors.
- Developed a feature for educators to upload syllabi in PDF/DOCX, automatically extracting units and topics to generate aligned assessments.
- Implemented a robust role-based system (Teacher/Student) with persistent history tracking and progress metrics.

Interactive Pokémon API Game

Personal Project / Independent Development • quien-es-ese-pokemon-malejo.netlify.app • July 2025 - September 2025

- Developed an interactive web application utilizing **Vue.js** and **JavaScript** to create a dynamic gaming experience.
- Integrated and consumed the public Pokémon **REST API**, implementing advanced asynchronous data fetching and rendering logic.
- Engineered complex filtering and search functionality to manage large datasets on the client side.
- Applied a **component-based architecture** to ensure code reusability, maintainability, and clean UI/UX design

Gastronomic Management System

Personal Project • quiosco-next-steel.vercel.app • August 2024 - December 2024

- Built a comprehensive restaurant management application featuring a customer-facing ordering system and a secure admin dashboard.
- Implemented real-time order tracking with dynamic status updates (Pending, Cooking, Delivered) using **React** and **Vercel**.
- Developed advanced filtering logic by categories and integrated a seamless checkout flow to optimize user experience.
- Managed the full deployment cycle on **Vercel**, ensuring high availability and performance for local business clients.

EDUCATION

SQL

DataCamp • Argentina • 2026

Vue JS - Udemy, Frontend web developer

Udemy • Remote • 2025

- Developed a game using the pokemon API
- Applied in a professional project.

C# and .NET developer - Udemy, Backend web developer

Udemy • Remote • 2025

- Applied in a professional project.

React JS - CoderHouse, Frontend web developer

CoderHouse • Remote • 2022

• Working on an functional online store and 4 more projects

• Applied in a professional project.

SKILLS

Frontend Development: JavaScript (ES6+), TypeScript, Angular (SPA), React, Vue.js

HTML5, CSS3, Tailwind, Bootstrap

Backend & Databases: Node.js, C#, .NET, REST APIs, SQL, PostgreSQL, MySQL

Artificial Intelligence: Prompt Engineering, AI-assisted development, internal training in Agentic AI

Tools & Platforms: Git, Azure DevOps, Figma, Agile / Scrum, English – Intermediate / Professional working proficiency
